Unit Height: 7'-2 1/2" (2197) Rough Opening Height: 7'-2 3/4" (2203) Glazing: Standard unit prep'd for 1/4" (6) glazing.	Anodized Finish: Clear or Dark Bronze
---	--

Compliant with UL 1784 - Air Leakage Test of Door Assemblies

- Gasketing material is high temperature silicone.
- Floor Smoke Seal is high temperature brush.
- All panels wet glazed with red high temperature silicone sealant at corners.
- All seals are factory installed to maintain UL 1784 rating.

See Arch. Specifications starting on page A16.0.

Installation and Operation

- Door perimeter mounted within curtainwall or rough opening with 1/4" minimum shim space at header & jambs. Finish floor not to exceed 1/4" out of level. (See page A9.1)
- Sliding panel rolls on nylon covered track at header for quiet, smooth, anti-friction operation.
- Standard sliding panel (SX) glazed with 1/4" tempered glass (shown) can be opened with 8 to 12 lbs of force. SX panel can swing out 90° at any point of travel, after positive latching is released, requiring no more than 50 lbs of force applied at the strike stile.
- Finger Safety: When sliding open, strike rail of sliding panel will stop 3 1/2" (89) short of adjacent sidelite. Result is slide opening.
