The tallest children's hospital in the world, Ann & Robert H. Lurie Children's Hospital of Chicago, integrates inpatient and ambulatory care, diagnostic and treatment spaces and clinical support. Lurie Children's is located on a 1.8-acre site on the Northwestern University's Feinberg School of Medicine Campus. The building's design supports a 2nd floor emergency department, 3rd and 4th floor diagnostic and outpatient clinics, along with radiology, operating rooms, psychiatry and support services on the remaining lower floors of the building. The upper floors house inpatient services. Color selections for the hospital are based on five palettes – city, park, lake, woods and prairie – inspired by Chicago and the surrounding regions.

Horton Automatics can be seen throughout the hospital and are featured prominently in the ICU and patient rooms.

Project Spotlight

"At Lurie Children's, durability and reliability were of the utmost concern when selecting automatic doors for patient spaces in the ICUs and Emergency Department. Horton's proven track record of providing the highest quality automatic doors made them the perfect choice for such critical locations."

– Stuart Baur
Principal / ZGF Architects LLP
