Serving the residents of Eastern Oregon, St. Anthony Hospital is a general medical and surgical hospital located in Pendleton, OR. Built on 93 acres of land, the 25-bed critical access care facility will serve patients from across the region. The hospital complex will include an associated office building, off-street parking for 500 and a helipad for emergency use. The hospital opened in November 2013.

Architects at ZGF specified Horton Automatics for the sliding and swing doors. Bi-parting automatic sliding doors were installed in the ambulance, ER and main entrances. In the patient rooms ZGF specified both smoke rated and non-smoke rated manual ICU doors. Some of which are non-breakaway and some have full break-out capabilities for ease in moving beds in and out of the rooms.
