Typical Perimeter Mount Frame Installation

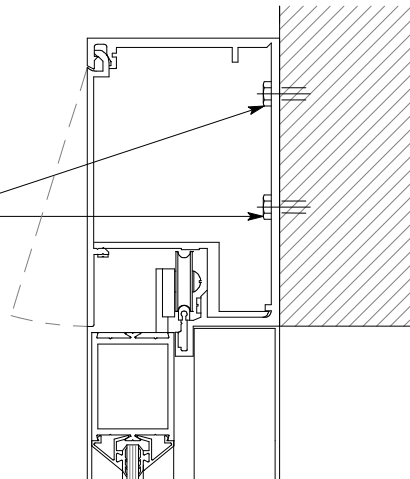

Typical Surface Mount

Provide rigid support, i.e. wood or metal studding (or standard curtainwall min. 1/8" thick) to allow Horton header and jambs to be secured as shown using #14 HHSMS fasteners approximately every 36".

Fasteners provided by factory. Alternate fasteners provided by authorized Horton installer.

Note:
 Atmospheric (Series 2000) header shown. Similar for Sterile (Series 2001) header.

Typical Bottom Guide
